Barcode system to protect your organization's money transfer

BUSINESS PRESENTATION

Our way of making our products
reach our customer's hands

Risk associated with : Exchange rates ,bar code system to curb
corruption, customer price markets and also donation protocols.

OUR GLOBAL IDEA

A vintage black rotary telephone is the central focus, resting on a dark wooden desk. The phone's handset is on the right, and the rotary dial is prominently displayed in the center. The dial has numbers 1 through 0 arranged in a circular pattern. To the left of the phone, a black pen with gold-colored accents lies horizontally. Below the pen is a small, open notepad with faint, illegible handwriting. The background is a warm, golden-yellow light, creating a soft glow around the objects.

Enabling people to donate
money to households in need
without involvement of
intermediaries.

Providing an open market to
customers who are able to obtain
goods with their own Price routes
by matching the to customers.

HOW IT WORKS.

Allowing for Businesses to transact with our coin Pesa Otas with other business across different places (buy and sell) ,allowing for currency exchange even for individuals :

We allow for Barcode system that protects your money in your organization preventing instances of corruption by use of cryptography in your money flow system,.

PESA OTAS .
